### DETAILED ACTION

This Office action is in response to the applicant's paper filed on 9/16/04.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 29-34, and 43-48 are rejected under 35 U.S.C. 102(b) as being anticipated by Skelton (US 5,642,590).

In regard to claims 29, 30, 32-34, Skelton shows in figure 6 a lightweight, deployable structure comprising at least three compression members 14a, 14b, 14c that each lie on the surface of one of at least three different planes that intersect one another, a set of at least six tension members 12a-12f that connects each of the at least three compression members 14a, 14b, 14c, and the at least three tension members of the set of six tension members 12a-12f are arranged in a radial configuration, and at least one tension member 12d is arranged in an internal configuration.

In regard to claim 31, Skelton teaches at least four compression members 14a, 14b, 14c, lie on the surfaces of two different planes that intersect one another, a set of at least six tension members 12a-12f that connects each of the at least four compression members with at least one other compression member of the at least four compression members 12a-12f, at least three tension members 12a-12f are arranged in

Art Unit: 3635

a radial configuration and at least one tension member 12b is arranged in a circumferential configuration.

In regard to claims 43-48, Skelton teaches at least four compression members 14a-14c, an outer set of at least six tension members 12a-12f that connects the at least four compression members with one another at outer tension member attachments, an inner set of at least four tension members 12a-12f, that connects the at least four compression members 14a-14c with one another at inner tension member attachments having polygonal faces, and arrangement an internal configuration, at least three tension members 12a-12f are arranged in a radial, an internal and a circumferential configurations.

***Allowable Subject Matter***

Claims 20-28, 35-38, and 49-55 were previously allowed.

***Response to Arguments***

Applicant's arguments with respect to claims 29-34, and 43-48 have been considered but are moot in view of the new ground(s) of rejection.
